PROFESSIONAL DEVELOPMENT

Metropolitan Transportation Authority (MTA) | New York, NY

Jan. - May 2026

Technology Analyst Intern

- Develop and optimize digital workflow sites using Power Automate, Power Apps, and SharePoint, enabling employees to efficiently access, submit, and automate forms, including memorandums, while dynamically populating user inputs
- Streamline data process and improve operational efficiency by integrating automated submissions and real-time form tracking
- Collaborate on data migration to a virtual machine environment to centralize and secure operational data

Develop for Good | Remote

Sept. 2025 - Mar. 2026

Product Lead

- Oversee multiple design and engineering teams across 5-month non-profit projects, leading a total of 6 managers (including product, design, and technical managers) to keep team aligned with project goals and on track to deliver final product
- Conduct client meetings (3-4 different non-profit partners) to gather requirements and translate client needs into an actionable roadmap
- Lead sprint planning and backlog prioritization to manage scope, feasibility, and impact, ensuring efficient cross-functional team progress

Sony Music Entertainment | New York, NY

May - Aug. 2025

Rights Management Intern

- Resolved conflicts across 300k+ music asset records by querying YouTube, Meta, and MediaMatch Content Management Systems, analyzing rights metadata and identifying ownership overlaps to ensure accurate attribution, reducing conflicting claims by 30%
- Utilized Youtube's Content ID API to validate asset fingerprinting, validate fingerprinting accuracy, and improve conflict resolution protocols for revenue-generating content

Develop For Good | Remote

Oct. 2024 - Mar. 2025

Product Manager

- Facilitated weekly cross-functional meetings with design team and nonprofit stakeholders to gather feedback, align on priorities, and iterate on features, resulting in improved communication and a 20% reduction in backlog turnaround time
- Led the development of nonprofit website by overseeing user research interviews, usability testing, wireframing, and prototyping; broke a 5-month project into 8 bi-weekly Agile sprints to ensure timely and user-centric delivery
- Conducted 1:1 interviews with donors, partner orgs, and youth clients to identify pain points in navigation and accessibility, and better inform UX and product decision, leading to a 60% increase in user satisfaction post-launch

Cornell Tech | New York, NY

Apr. - Sept. 2024

Researcher at the Matters of Tech Lab

- Developed AI-powered communication tools and interfaces in JavaScript to support Augmentative and Alternative Communication for users with speech disabilities, enabling timely and efficient expression of humor
- Reduced typing time for AAC technology users by integrating suggestion words and phrases powered by genAI (GPT-3) and language models, contributed to prototypes for [Why So Serious? Exploring Humor in AAC Through AI-Powered Interfaces](#)

MetLife | New York, NY

June - Aug. 2024

Actuarial Intern

- Improved the accuracy of reserve predictions to within 5% of actual figures by applying statistical techniques, enabling precise planning for reserve amounts and ensuring optimal financial management
- Queried and extracted policy and reserve data using SQL, performing trend analysis and historical average to project future liabilities and inform monthly reserve planning
